INDEX TO VOLUME XLVI.

A

Academy, National, meeting, 1868, 428.
Nat. Sci. Philad., Proceed., 152.
St. Louis, Transactions, 288.
Air-rings, visible, *Ball*, 260.
American Assoc., Proceedings, 1866, 151; 1867, 287; 1868, 148, 275.
Naturalist, noticed, 286.
Ammonia, nitrite of, *Loew*, 29.
Andes, observations on, *Orton*, 203.
Antimony, sulphates of oxyd of, *Dexter*, 78.
Appleton's Annual Cyclopedia, 432.
Arnott, G. A. W., obituary, 273.
Asteroids, (91) Ægina, 147.
(93) Minerva, 147.
(94) Aurora, 147.
(95) Arethusa, 147.
(96) , 147.
(97) Clotho, 147.
(98) , 274.
(99) , 274.
(100) Hecate, 393.
(101) Helena, 274, 393.
(102) Miriam, 275, 392, 393.
(103) , 392, 393.
(104) , 392, 393.
(105) , 392, 393.
(106) , 393.
Astronomy, Lockyer's, noticed, 275.
Watson's, noticed, *Newton*, 145.
Auroras, Sept., 1868, in Me., *Gilman*, 390.

B

Ball, R., air-rings, 260.
Barker, G. F., chemical abstracts, 129.
notices in physiological chemistry, 233, 379.
Bayma's Mechanics, *Norton*, 167.
Bernard on sugar in the liver, 379.
Berthelot on saturating organic bodies with hydrogen, 125, 395.
on carbonylic sulphid, 129.
Bickmore, A. S., journey through China, 1.
Bigsby's Thesaurus Siluricus, 435.
Bone caves of Brazil, *Reinhardt*, 264.
Bost. Nat. Hist. Soc. Memoirs, 152.
Proceedings, 152, 288.
Botany—
Algæ from hot springs, *Wood*, 31.
Nebraska Cretaceous plants, 91.
N. Am. cretaceous and tertiary flora, 401.
Nomenclature, laws of, at Botan. Congress, 63.
remarks on, *Gray*, 74.
Botanical Works noticed:—
Brown, R., works, v. II, 271.
De Candolle, A., Prodromus, 408.
De Candolle, C., Théorie de la feuille, 272.
Hoopes, Book of Evergreens, 270.
Linnean Soc. Journal, 271.
Martius, Flora Brasiliensis, 408.
Schmidt, Reisen in Amur-lande, 408.
Braithwaite's Retrospect, noticed, 286.
Brewer, W. H., notice of Darwin's Variation under domestication, 140.
British Assoc., meeting in 1868, 148.
in 1869, 430.
Brown, R., botan. works, noticed, 271.
Browne, J. R., on Mineral resources of U. S., noticed, 430.
Brush, G. J., sussexite, 140, 240.
Kustel on Ores, 287, 432.

C

California earthquake, Oct., 1868, 428.
human remains in, *Winslow*, 407.
Calomel, vapor-density of, 398.
Cambridge Physics, noticed, 285.
Carbon, bisulphid of, in sunlight, 363.
Carpenter, W. B., Eozoon Canadense, 245.
Caucasus, notes on, *v. Koschkull*, 214, 335.
Cerium, equivalent of, *Wolf*, 53.
Chambers's Encyclopedia, 433.
Chase, P. E., rain-fall affected by the moon, 281.
connotations of magnetism, 398.
Chemistry, Eliot and Storer's, noticed, 130.
physiological, notices, *Barker*, 233, 379.
Cheyney, J. S., mode of showing vibrations, 243.
China, journey through, *Bickmore*, 1.
Chladni plates, mode of showing the vibrations in, *Cheyney*, 243.
Chromium, mode of obtaining, 131.
Coal, see Geology.
Coan, T., eruption in Hawaii, 106.
Combustion under pressure, 394.
Cope, E. D., new Enaliosaur, 263.
on genus Lælaps, 415.
Crookes's ed. of Mitchell on assaying, 434.
Crowther, R., petroleum in Mex., 147.

D

Dana, J. D., eruption in Hawaii, 105, 123.
Mineralogy, 5th ed., noticed, 132.
Darwin's Variation under domestication, *Brewer*, 140.
Dawson, J. W., Eozoon Canadense, 245.
new Zonites, 265.
Acadian geology, noticed, 267.

Debray on compounds of molybdic and phosphoric acids, 397.
DeCandolle, A., laws of nomenclature at Botan. Congress, 63.
Prodromus, noticed, 408.
DeCandolle, C., Théorie de la feuille, 272.
Dexter, W. P., chemical apparatus, 51.
sulphates of antimony, 78.

E

Earth's orbit, secular variation in elements of, *Stockwell*, 87, 436.
Earthquake in S. A., Aug., 1868, 422.
in Cal., Oct., 1868, 428.
in Australia, Aug., 427.
Edwards's Butterflies of N. A., 150, 436.
Eggs, coloring matter of, *Städeler*, 235.
Electricity, Faraday's discoveries in, *Tyndall*, 34, 180.
Eliot and Storer's Chemistry, noticed, 130.
Entomological Soc., Philad., transactions, 150, 151, 288.
Entomologist, American, noticed, 435.
Eozoon Canadense, see GEOLOGY.
Erdmann's Exposé des Formations Quaternaires de la Suède, noticed, 435.
Essex Inst. Proceed., 288.

F

Faraday as a discoverer, *Tyndall*, 34, 180.
Fishes destroyed in Bay of Fundy, 269.
Fossil animals, see GEOLOGY and ZOOLOGY.
plants, see BOTANY.
Frankland on combustion under pressure, 394.

G

Gas lamp and regulator, *Dexter*, 51.
Geinitz on a German meteorite, 284.
GEOLOGY—
Amiens gravel, *Tylor*, 302, 436.
Bone caves, Brazil, *Reinhardt*, 264.
Denudation, subaërial, *Whitaker*, 268.
Enaliosaur, new, *Cope*, 263.
Entomostraca, Paleozoic, 265.
Eozoon Canadense, *Dawson* and *Carpenter*, 245, 436.
Ontario, geol. of, *Hunt*, 355.
Vt., geol. notes on, *Hunt*, 222.
Zonites, new, *Dawson*, 265.
GEOLOGICAL WORKS noticed:—
Bigsby, Thesaurus Siluricus, 435.
Dawson, Acadian Geol., new ed., 267.
Delesse et *Lapparent*, Revue de Géol., 270.
Erdmann, Exposé des Formations Quaternaires de la Suède, 435.
Kjerulf and *Dahll*, chart of S. Norway, 269.
Maps in preparation, 140.
Safford, Tenn. Geol. rep't., 435.
Gibbs, W., chem. abstracts, 124, 258, 394.
uric acid, 289.
Gilman, W. S., auroras in Me., 390.
Gold mining, Phillips on, noticed, 134.
ores, Kustel on, *Brush*, 287, 432.
Gray, A., remarks on laws of botanical nomenclature, 74.
botanical notices, 270, 408.
necrology, 273.
Gulf Stream fauna, *Pourtales*, 409, 413.

H

Hæmatoidin, Holm on, 233.
Hall, J., geol. map of U. S., by, 140.
paleontological report, noticed, 262.
Hansen on moon's constitution, *Newcomb*, 376.
Hawaii, eruption in, 105.
Heintz on formula of urea, 237.
Hennessey, J. H. N., rain-fall affected by the moon, 283.
Hetch-Hetchy valley, *Hoffmann*, 266.
Hill, T., on the occultator, 299.
Hillebrand, W., eruption in Hawaii, 115.
Hinrich's Atom mechanics, *Fleck*, 258.
Hitchcock, C. H., N. Am. geol. atlas by, 140.
Hoffmann, C. F., Hetch-Hetchy valley, 266.
Hofmann on persulphid of hydrogen, 396.
Holm on hæmatoidin, 233.
supra-renal glands, 236.
Hoopes on Evergreens, noticed, 270.
Human remains, see Man.
Hunt, T. S., geology of Vt., 222.
geology of Ontario, 355.
Hyatt on Polyzoa, noticed, 150.
Hydrogen, saturation with, *Berthelot*, 125, 395.
persulphid of, *Hofmann*, 396.

J

Johnson, S. W., Eliot and Storer's Chemistry, 130.
How Crops grow, by, noticed, 436.

K

Kölliker on polymorphism of anthozoa, and structure of tubiporæ, 273.
Koschkull, F. v., on the Caucasus, 214, 335.
Krantz's Catalogue, noticed, 287.
Kustel on Ores, noticed, 287, 432.

L

Lang's Astron. Tables, noticed, 275.
Lartet and Christy's Reliquiæ Aquitanicæ, 287.
Lehmann on sugar in the blood, 380.
Leipzig Astron. Gesellsch., publications, 288.
Lesquereux, L., Nebraska cretaceous plants, 91.
Liver, sugar in the, 379.
Lockyer's Astronomy, 275.
Loew, O., nitrite of ammonia, 29.
bisulphid of carbon, in sunlight, 363.
Logan, W. E., Eozoon Canadense, 245, 436.
Loomis's Meteorology, noticed, 149.
Loughlin, J. E., molybdenum and chromium, 131.
Lyman, C. S., Cambridge Physics, noticed, 285.
Lyman, F. S., eruption in Hawaii, 109.

M

Magnetism, connotations of, *Chase*, 398.
Magneto-electricity, see Electricity.
Man, remains of, in Cal. drift, 407.
Marsh, O. C., metamorphosis of Siredon, 364, 436.
new species of fossil horse, 374.
geol. map of U. S. by, noticed, 140.
Matteucci, C., obituary, 285.
Meek, F. B., Ethmophyllum and Archeocyathus, 144.
shell structure of spirifera, 262, 408.
Meek, F. B., and *A. H. Worthen*, on a fossil scorpion, etc., from Ill., 19.
Meteorite from Ga., *Shepard*, 257.
Germany, *Geinitz*, 284.
Kansas, *Mudge*, 429.
Meteorology, Loomis's, noticed, 149.
Mineral resources of U. S., Browne on, noticed, 430; Taylor on, noticed, 431.
Mineralogy, Dana's, 5th ed., 132.
MINERALS—
Aquacreptite, *Shepard*, 256.
Corundophilite, *Shepard*, 256; Cryolite, minerals in, *Rand*, 400.
Enargite from Cal., *Root*, 201.
Ivigtite found in Cryolite, *Rand*, 400.
Sussexite from N. J., *Brush*, 140, 240.
Tephroite from N. J., *Mixter*, 231.
Willemite from N. J., *Mixter*, 230.
Mining, Phillips on, *Silliman*, 134.
Kustel on, *Brush*, 432.
Mitchell on Assaying, new ed., 434.
Mixter, W. G., willemite and tephroite, 230.
Molecular mechanics, Bayma on, 167.
Molecular physics, principles of, *Norton*, 167.
Molybdenum, mode of obtaining, 131.
Molybdic and phosphoric acids combined, 397.
Moon's constitution, Hansen on, *Newcomb*, 376.
Mudge, B. F., Kansas meteorite, 429.

N

Naphthalin, Vohl's test for, 130.
N. Y. Regents of Univ., 20th report, 262.
Newberry, J. S., extinct N. A. floras, 401.
Newcomb, S., Hansen on the moon's constitution, 376.
Newton, H. A., Watson's Astronomy, 145.
Nobert's test-plate, *Woodward*, 352.
review of Stodder on, *Sullivant*, 347.
Norton, W. A., principles of molecular physics, 167.
Nugent's Optics, noticed, 436.

O

OBITUARY—
G. A. W. Arnott, 273.
M. Faraday, *Tyndall*, 34, 180.
C. Matteucci, 285.
C. G. Page, 149; J. Plücker, 149.
A. Rosing, 148.
N. B. Ward, 273.
Occultator, description of, *Hill*, 299.
Organic substances, artificial formation of, *Williams*, 327.
Orton, J., observations on the Andes and Amazons, 203.

P

Packard on study of insects, noticed, 274.
Page, C. G., obituary, 149.
Paleontology, see GEOLOGY and ZOOLOGY.
Petroleum in Mexico, *Crowther*, 147.
Phillips on Mining and Metallurgy of Gold and Silver, noticed, *Silliman*, 134.
Phosphoric and molybdic acids, 397.
Physiological chemistry, notices in, *Barker*, 233, 379
Planets discovered, see Asteroids.
Plücker, J., obituary, 149.
Pourtales, L. F., Gulf Stream fauna, 409, 413.

R

Rain fall affected by the moon, *Chase*, 281; *Hennessey*, 283.
Rand, T. B., ivigtite, 400.
Ranking's Med. Abstract, noticed, 286.
Reemelin on Wine making, 432.
Reinhardt on Brazil bone-caves, 264.
Rolfe and Gillet's Cambridge Physics, 235.
Root, E. W., enargite from Cal., 201.
Rosing, A., obituary, 148.
Rowley, S., theory of vision, 153, 430.

S

Safford's Tenn. Geol. report, noticed, 435.
Sandwich, Is., eruption in, 105.
earthquake wave at, 426.
Scorpion, fossil, *Meek* and *Worthen*, 19.
Scudder, S. H., mole crickets, 417.
two Carboniferous insects, 419.
Sheffield Laboratory Contrib, 230, 240.
Shepard, C. U., on aquacreptite, 256.
corundophilite, Chester, 256.
meteorite from Ga., 257.
Silicon, iodid of, *Friedel*, 398.
oxychlorid of, 125.
Silliman, B., Phillips on Gold Mining, 134.
Amer. Assoc. meeting, 275.
transformation of Siredon, 421.
Silver mining, Phillips on, noticed, 134.
Siredon, metamorphosis of, *Marsh*, 364, 436; *Silliman*, 421.
Städeler on yolk of eggs, 235.
Stockwell, J. L., variation in elements of earth's orbit, 87, 436.
Stodder on Nobert's test-plate, review of, *Sullivant*, 347.
Strecker on sulphacids, 124.
uric acid, 124.
Sugar in the liver, 379.
Sullivant, W. S., notes on Stodder on Nobert's test-plate, 347.
Sulphacids, formation of, *Strecker*, 124.
Sulphid, carbonylic, *Berthelot*, 129.

T

Taylor on Mineral resources of U. S., 431.
Teyler Museum, Archives, noticed, 286.
Tylor, A., on the Amiens gravel, 302, 436.
Tyndall, J., sketch of Faraday, 34, 180.

U

U. S. Astron. and Meteorological Observations for 1865, 146.
Urea, formula of, *Heintz*, 237.
Uric Acid, *Gibbs*, 289; *Strecker*, 124.

V

Vermont, notes on geol., *Hunt*, 222.
Verrill, A. E., Alcyonaria in Y. C. Museum, 143.
notice of Hyatt on Polyzoa, 150.
Vision, theory of, *Rowley*, 153, 430.
Vohl's test for naphthalin, 130.
Volcanic eruption, Hawaii, 105.

W

Ward, N. B., obituary, 273.
Watson, J. C., planets discovered, 274, 392.
Theoretical Astronomy, noticed, 145.
Whitaker, W., subaërial denudation, 268.
Whitney, H. M., eruption in Hawaii, 112.
Williams, C. G., artificial formation of organic substances, 327.
Winchell, A., geol. chart. by, 140.
Wine making, Reemelin on, noticed, 432.
Winslow, C. F., human remains in Cal., 407.
Wolf, C., equivalent of cerium, 53.
Wood, H. C., algæ from Cal. hot spring, 31.
Woodward, J. J., Nobert's test-plate, 352.
Workshop, The, noticed, 151, 434.
Worthen, A. H., see *F. B. Meek*.

Z

Zoology—
Alcyonaria in Y. C. Museum, *Verrill*, 143.
Anthozoa, polymorphism of, 273.
Carboniferous insects, *Scudder*, 419.
Ethmophyllum and Archeocyathus, *Meek*, 144.
Gulf Stream fauna, *Pourtales*, 409, 413.
Horæ, fossil, *Marsh*, 374.
Lælaps, *Cope*, 415.
Mole crickets, *Scudder*, 417.
Scorpion, etc., from Ill., *Meek* and *Worthen*, 19.
Siredon, metamorphosis into Amblystoma, *Marsh*, 364, 436; *Silliman*, 421.
Tubiporæ, structure of, 273
Zool. Works, noticed:—
Edwards, N. A. Butterflies, 150, 436.
Hyatt, Polyzoa, 150.
Packard, Study of insects, 274.
